relationship

LeMasters and his "83%" figure

Lemasters, E. E. (1957)
Parenthood as crisis
Marriage and Family Living 19:352–355.

Over 25 studies show that marital quality drops in the transition to parenthood, often precipitously.

Belsky, J & Kelly J (1994)
The Transition to Parenthood: How a First Child Changes a Marriage and Why Some Couples Grow Closer and Others Apart
Dell, (NY)

Belsky, J & Rovine M (1990)
Patterns of marital change across the transition to parenthood: pregnancy to three years postpartum
J. of Marr & the Fam 52: 5 – 19

Marital quality decreases precipitously in 40% to 67% of married couples beginning within the first year of the baby's life

Shapiro, Alyson *et al* (2000)
The baby and the marriage: Identifying factors that buffer against decline in marital satisfaction after the first baby arrives.
Journal of Family Psychology 14(1): 59-70

90% satisfaction-loss figure

Doss BD *et al* (2009)
The effect of the transition to parenthood on relationship quality: an eight-year prospective study
J Pers & Soc Psych 96: 601 -619

33% - 50% of new parents have as much stress as distressed couples already in counseling

Twenge, J. M. *et al* (2003).
Parenthood and marital satisfaction: A meta-analytic review.
Journal of Marriage and the Family, 65, 574-583.

Marital quality consistently declines in a predictable pattern: first for the wives, then for the husbands

Belsky, J & Pensky E (1988)
Marital change across the transition to parenthood
Marr & Fam Rev 12: 133 – 156

Marital satisfaction actually peaks in the last trimester of pregnancy, then begins to decline

Heinicke, G *et al* (1997)
Marital adaptation, divorce and parent-infant development: a prospective study
Inf Mental Health J 18: 282 – 299
